

UREA TESTING

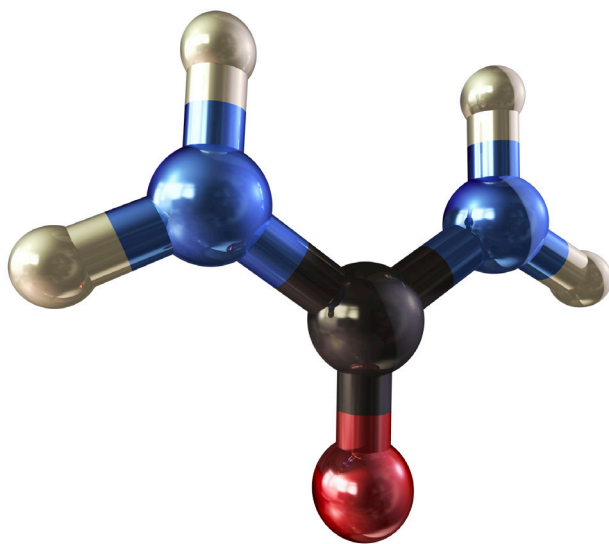

Eurofins QTA is part of the Eurofins Scientific global network. With over 16,000 employees in more than 200 laboratories across 36 countries, Eurofins Scientific leads the world in the field of environmental laboratory testing and is a global market leader in agrosience, genomics, and central laboratory services.

Utilizing patented infrared technology, Eurofins QTA provides rapid, on-site testing solutions specifically for urea producers. QTA's expertise in model development delivers accurate and reliable results for multiple parameters all in less than 2 minutes.

Capabilities:

- Total Nitrogen
- Nitrogen from Urea
- Biuret
- Moisture
- Formaldehyde
- Free Ammonia
- Alkalinity
- pH
- Performance Additives
- And more...

Benefits of Urea Analysis with Eurofins QTA:

- Fast and easy to use with minimal training
- Rapid analysis of multiple parameters
- Testing of Gases, Liquids, and Solids
- Nondestructive, no sample preparation
- Extensive reporting, CofA, and data services
- QTA handles all model validations and updates
- 24/7 live technical support
