

SPICE TESTING

Eurofins QTA is part of the Eurofins Scientific global Network which has over 16,000 employees in more than 200 laboratories across 36 countries. The Eurofins US Food Testing Division consists of a network of commercial testing laboratories strategically located throughout the United States. With the most comprehensive portfolio of food safety testing services in the industry, our goal is to be the bioanalytical testing company of choice for the US food, feed, petfood, animal health, dietary supplement, pharmaceutical, and biotech industries.

Capabilities:

- Steam Volatile Oil (SVO)
- Moisture
- Ash
- And more...

Benefits of Spice Analysis with Eurofins QTA:

- Fast and easy to use with minimal training
- Rapid analysis of multiple parameters
- Little or no sample preparation
- Extensive customized reporting, CofA and data services
- QTA handles all customized model development, validation and updates
- QTA FT-NIR instrumentation provided (no capital expense)
- Simple on-going monthly fee for service based on sample volume
- 24/7 live technical support, including training

Technical Details:

Utilizing FTNIR and Chingometrics™ techniques for algorithm development, Eurofins QTA provides rapid, on-site testing solutions specifically for the spice industry. QTA's expertise in model development delivers accurate and reliable results for multiple parameters all in less than 2 minutes. QTA's service is internet based, with a central server ensuring consistency over multiple sites using the same algorithm.
