February 16, 2021

Dear Kentucky Drinking Water Certified Laboratory;

Please find enclosed your laboratory's Drinking Water Certificate for 2021. Please review the certificate and associated list of your laboratory's certified method-analyte pairings for drinking water compliance samples in Kentucky. The attached certificate is valid until December 31, 2021.

- Please note, a PT reporting method code column has been added to your method analyte table. This code is the same as the TNI method codes all PT providers utilize. By using this code when reporting PTs for KY, you will help us easily transition into a PT tracking database. Should you have any problems using these codes for PT reporting purposes, please let us know at [dowlabcertification@ky.gov](mailto:dowlabcertification@ky.gov). If you are using a method that does not have a PT reporting method code, you will need to report the method the same way you have in the past.**

We look forward to working with your laboratory in the upcoming year. Please visit our Laboratory Certification Program webpages for contact information, program updates, renewal schedule/document requirements and links to useful documents.
