- FSMA Produce
- PCQI – Preventive Controls for Animal Food and Human Food
- GLP within Food Plant Laboratories
- Food Safety Culture
- HACCP and Food Safety Program Development and Training
- Internal Food Safety Auditor
- Nutrition Labeling
- Food Defense and Vulnerability Assessment
- Corrective and Preventive Action Training
- Customized Training

Food Safety Consulting

- Gap Analysis
- GFSI Scheme (SQF, BRC, FSSC 22000, ISO 22000) Consulting
- GMP
- SOP Templates
- Analysis of Lab Results
- Harborage Site Investigations
- Food Fraud Database Subscriptions
- Consulting Membership Special Rate Packages
- Label Review Services
- Label Translation Services
- Process Authority
- Expert Opinion Letter
- Allergens
- Ingredient Reviews
- HACCP
- FSVP
- PROP 65
- Identity Preservation (GMO and Label Claims)
- Supplier Qualification & Monitoring Programs
- Food Safety Plan Review

Our consulting activities are provided by independent companies and separate from testing and certification activities.

Food Testing

Allergens Testing

- Allergen monitoring programs
- Qualitative and quantitative analysis
- EU-regulated allergens & more
- FDA-regulated “Big 8”
- Full tree-nut panel
- Gluten-free testing

Chemical Ingredient Verification

- Compendial testing
- Non-compendial testing, according to a client, industry, or developed method

ID and Purity

- Analysis of raw material components
- Authenticity testing
- Identity and purity of raw materials
- Method development and validation
- Vendor qualification

GMO Testing

- Crops, ingredients, and finished products
- Non-GMO verification program
- Export to EU, Japan, and other markets
- Other GMO-related programs and label claims

Food Authenticity and Forensics

- Adulteration
- Authenticity of honey, olive oil, juices, syrups, and more
- Botanical identification and verification
- Meat speciation identification

Chemical Ingredient

- Antibiotic residues
- Filth and extraneous material
- Heavy metals
- Mycotoxins
- Pesticide residue screens

Microbiology & Pathogens

- Bacterial strain subtyping
- Challenge studies
- Courier and rapid logistic capabilities
- Environmental monitoring programs (EMP)
- Microbial identification
- Microbiome profiling
- Metagenomic shotgun & whole bacteria genome sequencing
- On-site and modular services
- Probiotic enumeration & live/dead cell count by flow cytometry
- Rapid pathogen detection technologies
- Sanitation verification and process validation studies
- Spoilage testing

Stability and Shelf Life

- Custom chamber conditions
- ICH guidelines
- Monitor changes in microbiological activity, rancidity, ingredient activity, and sensory attributes
- Photostability chamber
- Real-time and accelerated conditions
- Specialized project trend reporting
- Temperature and humidity controlled chambers
- Verify expiration dates and 'best if used by' claims

Nutrition Analysis

- Amino acids
- Enzymes
- Fatty acids
- Guaranteed analysis
- Medicated feed
- Minerals
- Preservatives/antioxidants
- Proximates
- FDA, USDA regulatory-compliant nutrition labeling services
- Vitamins
